A THANK YOU TO OUR SPLITBOARD COMMUNITY

It's been 20 years since we posted prototype pictures of the first binding on *splitboard.com*. It was just for fun. We figured we'd build a few bindings on the weekends for friends and other split nerds and that would be that.

But the response was insane. Snowboarders were hungry for a backcountry experience that went beyond snowshoe slogging and wobbly splitboarding with binding adapters. They were ready for a splitboard specific binding, and we gave it to them. Ready or not.

The last 20 years have been a whirlwind of building a company alongside the bindings. There have been a lot of wins, a lot of fails, some high highs, and some low lows. And through it all, our dealers, our partners, the splitboard community - YOU - have been there for us. Pushing us to be better, giving feedback, supporting us with your energy, and stoking the fire. So, thank you. We couldn't have done this without you.

- Will & Becca and the Spark R&D crew

SPLITBOARD BINDING TECH

Asym Rip 'N' Flip Highbacks

An asymmetrical design features individual right and left highbacks that slope inward to match the rider's stance.

- Tool-free micro-adjustable from 0° to 22° customization of your forward lean angle
- Forward lean adjuster flips between forward lean and -13° touring position for easy transitions
- Stiff where you need it toe-to-heel, yet torsionally flexible for improved mobility while riding
- Lateral slots for BD Touring Strap for greater edge control while skinning

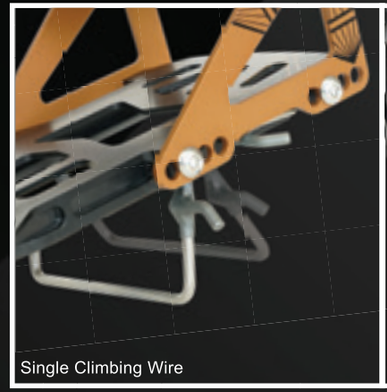
Pillow Line Straps

One-piece molded construction straps for durability and comfort. Pillows are thin and flexible for a comfortable fit, while thicker ribs are held off the boot and provide stiffness.

- Lightweight & ultradurable
- Waterproof - these will not freeze!

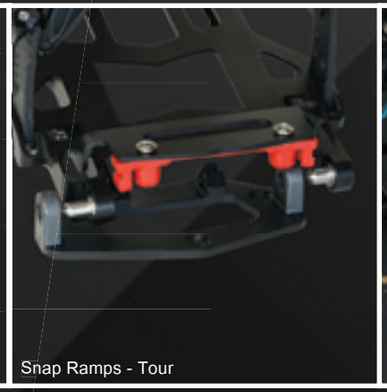
TESLA T1 TECH

Our T1 binding system is the most recognizable, user-friendly, trusted, and efficient splitboard binding system on the market.



Single Climbing Wire

Easily switch from stowed, to low (12°), to high (18°) and back again with your poles thanks to our integrated ST Whammy Bar side arm levers.



Snap Ramps - Tour

Bindings slide sideways into offset touring brackets and are locked into place with our snap ramps.

Snap Ramps - Ride

Slide the bindings on your pucks and snap the ramp down to ride. Flip the ramp up and slide the bindings off to remove.

ST TECH

Our custom thermoplastic blend is overmolded onto the underlying metal part to make these components extremely slippery, durable, and abrasion-resistant. ST stands for Smooth Touring.

ST Brackets

Ibex ST Crampons

ST Whammy Bars

ARC ST

The Arc ST provides splitboarders with lightweight efficiency and confidence in both tour and ride mode. Featuring medium flex straps and highbacks, the Arc ST excels in the trees and powder, but is tough enough to handle complex conditions and long expeditions.

ARC ST FEATURES

CNC Machined Baseplates

Machined cutouts for maximum weight savings.

Arc ST Asym Rip 'N' Flip Highbacks

Molded with a moderate glass fiber fill for a medium and surfy response. Features an asymmetrical shape giving riders a natural stance for both left and right boots. The forward lean adjuster is tool-free and easily flips between tour and ride mode.

Arc ST Pillow Line Straps

Ankle straps deliver weight savings and flexibility through a smaller footprint and flex window for maximum agility. Pillow Line straps are durable, waterproof, one-piece construction for all-day comfort so you can focus on the ride.

Ladders and Adjusters

Produced in-house with a unique custom blend of thermoplastics that maintain flex over a wide temperature range.

Unisex Sizing

Sizing	**US** Men's	**US** Wmn's	EU	Mondo

ST TECH

SURGE ST

The Surge ST delivers uncompromising power and precision for big and burly riders or those who want to push the limits. Featuring stiffer straps and highbacks, these splitboard bindings thrive on big mountain lines and demanding terrain.

SURGE ST FEATURES

CNC Machined Baseplates

Solid baseplate for maximum stiffness.

Surge ST Asym Rip 'N' Flip Highbacks

Molded with a high glass fiber fill for a stiff ride and maximum response. Features an asymmetrical shape giving riders a natural stance for both left and right boots. The forward lean adjuster is tool-free and easily flips between tour and ride mode.

Surge ST Pillow Line Straps

Ankle straps deliver a secure, supportive fit through a solid asymmetric design, for optimal comfort and control. Pillow Line straps are durable, waterproof, one-piece construction for all-day comfort so you can focus on the ride.

Ladders and Adjusters

Produced in-house with a unique custom proprietary blend of thermoplastics that maintain flex over a wide temperature range.

ARC ST PRO

The Arc ST Pro Bindings feature all the same great assets of our standard Arc ST but tuned to perfection with custom components and premium materials.

PRO ST TECH

Carbon Reinforced Nylon Highbacks

More responsive, lighter, and stiffer than our standard glass reinforced highbacks. Injection molding allows for more complex geometry and improved impact strength compared to other methods of carbon fiber construction.

Full Pebax® plastics in Pillow Line Straps, Ladders, and Adjusters

Pebax is a premium material most often found in high-end ski boots as it provides consistent stiffness and improved toughness in cold temperatures. It's also 20% lighter than our standard material.

7075 Aluminum Heel Loops

Thinner and lighter than our standard heel loops while maintaining the required strength.

Every Gram Counts

Pro aluminum hardware replaces 7 stainless steel components for a 65% hardware weight savings. Custom made hardware allows us to add splitboard specific features like deep hex heads for less strippage and hollow pivot pins for weight savings.

PRO Series Bindings
The lightest and highest performing splitboard bindings in the world - made with incredible attention to detail and no compromises.

Black/Copper

Arc ST Pro Weight - Medium: 1.22 lb/ea (556g) - 2.45 lb/pr (1112g)
Patented

SURGE ST PRO

The Surge ST Pro Bindings feature all the same great assets of our standard Surge ST but tuned to perfection with custom components and premium materials. Trusted by professional big line riders and mountain town legends alike.

PRO Series Bindings
The lightest and highest performing splitboard bindings in the world - made with incredible attention to detail and no compromises.

Black/Cobalt

Surge ST Pro Weight - Medium: 1.34 lb/ea (610g) - 2.68 lb/pr (1220g)

NR PRO

The NR Pro blends features of the Arc and Surge models to create a finely tuned piece of equipment masterminded by Nick Russell himself. Designed for those looking to unleash the animal within, these beauties live for the big mountains, are feature-rich, and emit timeless snowboard culture. This binding is one-of-a-kind, and will deliver premium backcountry performance.

PRO ST TECH

Rider: Nick Russell
Photo: Colin Wiseman

Snow Camo

NR Pro Binding Weight: 1.42 lb/ea (638g) - 2.84 lb/pr (1276g) - Medium
Patented

Surge ST Pro Baseplate

The backbone of the NR Pro binding starts with stiff and solid baseplates.

Multi-Hole Pro Heel Loop

A design focused on the art of the turn. The three hole option allows for fine-tuned highback rotation, providing extra response, stability, and control to each turn.

Arc ST Pro Pillow Line Straps

Provide the agility and weight savings for long ascents and painting the perfect line.

Hardware & Graphics

Finished with our anodized, custom 7075 aluminum pro screws, and hand drawn Nick Russell graphics to give you that extra style with every turn.

Snow Camo Baseplate & Highback Padding

Built with a pre-installed 6mm snow camo baseplate padding kit to optimize warmth, comfort, and cushion. Paired with 3mm of padding on the highback to enhance the binding contour for a perfect boot fit.

HARDBOOT BINDINGS & GEAR

Dyno DH Hardboot Binding

The Dyno DH is our acclaimed hardboot specific splitboard binding. It is designed to fit a variety of boots and delivers high-end performance to the dedicated hardboot segment of splitboarders. All parts are designed and manufactured by us from start to finish for the all-around precision that you can only get from a Spark made product.

Dyno DH bindings are for riding only. Carry them in your pack on the way up, while using your tech toes for touring. Then slide the Dynos on your pucks and lock into place with the snap ramps for the ride down.

- Extremely lightweight while maintaining backcountry dependability
- Stainless steel toe and heel bails
- Toe clip is designed to fit even low profile AT boots
- Set screw has a 4mm hex drive, found in our Spark Tool
- Features Tesla Snap Ramps for speedy, pinless transitions
- Puck compatible (Spark Canted Pucks recommended)
- Fits boots with 255 - 340mm sole length

Weight: 0.90 lb/ea (409g) - 1.80 lb/pr (818g)

Spark x ATK Tech Toes

Patented

A Spark R&D and ATK Binding collaboration designed and based off of the ATK Toe Piece from the Trofeo series - “Performing on Lightness.” Built specifically for the split-hardbooter, the Spark x ATK Tech Toes utilize ATK’s signature monolink technology with smooth entry, solid retention, and lightweight build. With an integrated hole pattern for factory splitboards there is no need for an adapter. Pair with our Hardboot Dual Height Wires and D Rex ST Pro Crampons to be ready for the skin track.

Featuring:

- Ergal 7075 aluminum sidearms and monolink technology
- Slotted rear holes compensate for insert pattern variability
- Heat treated pins are riveted to the toe piece arms, making the loss of a pin in the backcountry nearly impossible
- Custom stainless steel center screw for secure three-point attachment

Weight: 4.23 oz/ea (120g) - 8.47 oz/pr (240g)

Black

D Rex ST PRO Crampons

Our legendary hardboot crampons have multiple features giving splitboarders total confidence in dicey terrain. Riser blocks stack and unstack to keep full depth of teeth in the snow when using heel risers.

Featuring:

- Nested design saves space in the pack
- Manufactured with 7075 aluminum - strong, light, with minimal drag
- Overmolded ST Axle allows for easy installation, rotation, and removal

Weight: 5.15 oz/ea (147g) - 10.3 oz/pr (294g) - Regular

Sizes: Regular, Wide

Black

Hardboot Dual Height Wires

Wires offer 12° and 18° angles for comfort on any skin track. Comes with a heel adapter that screws into your splitboard inserts, and places your dual height wires right where they need to be, hitting the perfect spot on the heel of your hardboot.

Weight: 3.46 oz/ea (98g) - 6.91 oz/pr (196g)

Black

Hardboot Hardware Kit

Everything you need to keep your day in the mountains from being cut short. Includes a spare snap ramp, rear bridge, lugs, washers and extra screws for repairs in the field.

Weight: 1.7 oz (51g)

Black

Splitboarder: Mike Handford

ibex ST Crampons

Enjoy 4WD for your splitboard. An overmolded thermoplastic axle allows effortless installation and super-smooth rotation. Crampon teeth are fully engaged when used with or without the whammy bar for maximum security on dicey terrain. Our dual-width design features one crampon that is slightly wider than the other, allowing the crampons to nest together for easy handling and compact storage.

Weight: 5.5 oz/ea (156g) - 11.0 oz/pr (312g) - Reg

Sizes: Narrow, Regular, Wide

Splitboarders: Spark R&D Crew
Photo: Pierre Lucianaz

ibex ST PRO Crampons

A 7075 aluminum crampon body is just as strong, but lighter and thinner than our standard Ibex ST. It slices through the snow even better with less drag, saving you valuable energy output on the skin track. An overmolded thermoplastic axle allows effortless installation and super-smooth rotation. All in all, the Ibex Pro ST is 30% lighter than our standard Ibex ST - the lightest split crampon in the world. Its dual-width design features one crampon that is slightly wider than the other, allowing the crampons to nest together for easy handling and compact storage.

Weight: 4.23 oz/ea (120g) - 8.46 oz/pr (240g) - Reg

Sizes: Narrow, Regular, Wide

Black/Copper

Both Ibex ST and Ibex ST Pro are compatible with all Tesla and T1 bindings.

Sizing	Board Waist	Nested Crampon Inside Width
Narrow	25cm or less	12.8cm
Regular	25-26cm (most boards)	13.8cm
Wide	26cm or more	14.8cm

Spark Flat Pucks

Patented

Channel-like stance adjustability for splitboards built with inserts. This time-tested design has riders beyond stoked, and has made Spark Pucks our most popular splitboard accessory.

- Oversize aluminum center disc overlaps binding channels for maximum strength and rigidity
- Bindings slide on soft nylon material for effortless transitions
- Near-infinite adjustability, for your perfect stance and placement:
  +/- ¼" (6.5mm) toe/heel adjustment in .05" (1.3mm) increments
  +/- 30° range of angle adjustment in 3° increments
- Stance width adjustments in .17" (4.2mm) increments
- Works with all puck compatible splitboard bindings

Weight: 10.19 oz/pr (289g)

Spark Canted Pucks

Patented

Our canted version has all the same great features as our Spark Pucks. With 3° canting to reduce strain, your knees will thank you.

Weight: 11.36 oz/pr (322g)

Spark Solid Board Flat Pucks

We have the quiver game dialed with our Solid Board Pucks, because let's face it, sometimes you're just not on your split. Great for solid board mountaineering, snowmo-boarding, trips where you are traveling with multiple boards, or days when you may see a mix of resort riding and splitting. You may have a quiver of boards, but you only need one set of bindings.

- Near-infinite adjustability, just like our Spark Pucks:
  +/- ¼" (6.5mm) toe/heel centering adjustment in .08" (2.1mm) increments
  -12° to +30° angular adjustment in 3° increments
- Stance width adjustable in .2" (5mm) increments
- Can be used with 4x2 insert and channel boards
- Lightweight
- Works with all puck compatible splitboard bindings

Weight: 10.09 oz/pr (286g)

Black

Patented

Spark Solid Board Canted Pucks

Our canted version has all the same great features of our standard Spark Solid Board pucks, only with 3° canting to reduce knee strain.

Weight: 11.5 oz/pr (326g)

Fixie Clips

Our Fixie Clips come in a sleek, lightweight aluminum design that features no moving parts. It's stiff, simple, and requires no rotation - just put your board together and go. The Fixies have built-in adjustability to help compensate for varying board hole patterns. They shed snow and ice, and won't slip over time.

Compatibility: Fixie Clips come in both through-mount and top-mount styles to accommodate any board construction.

Top-Mount

Metal Black

For boards that have inserts at the clip mounting points. (you do not see any screw heads on the base of your board)

Weight: 1.98 oz/pr (56g)

Through-Mount

Metal Black

For boards that are drilled through at the clip mounting points. (you can see screw heads on the base of your board)

Weight: 2.26 oz/pr (64g)

Spark Tip & Tail Clips

Our tip and tail clip design offers a custom fit to match the variability in any board. With five progressively tighter notches you can get your board as tight as you want. No need to freeze your fingers, this clip is effortlessly operated with your gloves on.

Weight: 0.56 oz/pr (16g)

Black

Patented

Unlock

Lock

Molded Fixie Clips

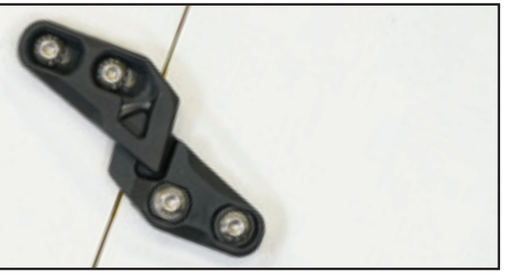
These clips are a molded version of our aluminum Fixie Clips and are made from a custom glass-reinforced thermoplastic and maintain the same built-in adjustability with no moving parts. The material is wear-resistant and more economical, making these a good choice for someone looking for performance and affordability over the bomb-proof aluminum option.

Compatibility: Molded Fixie Clips come in both through-mount and top-mount styles to accommodate any board construction.

Weight: 1.4 oz/pr (42g)

Black

Top-Mount



Through-Mount

Tailclip Kit

Our tailclip kit is a retrofit addition to any skins. All you need are scissors and a hammer - large diameter rivets make for an easy and secure installation. Asymmetric clips with dual angled hooks and an extended slot design yield maximum adjustability to fit any board shape (even swallowtails).

Weight: 2.2 oz (63g)

Black

Patented

T1 Riser Kit

Big feet? We've got you covered. Our riser kit screws in underneath touring brackets and heel rests to raise you up. This increases the binding rotation angle while touring to prevent toe strike and increase stride length. Compatible with all Tesla T1 bindings.

Weight: 5.43 oz/pr (154g)

Black

T1 Step Locker

Patented

The option to lock your heel while touring helps you better adapt to diversified terrain types where quick descents, side stepping, and skate-splitting become more effective means of backcountry travel.

- Rotate the lever to lock the heel in position
- Plastic lock bar grabs underneath the baseplate without wearing either piece
- Locker held securely in both locked and unlocked positions
- Locker assembly screws in under heel rest
- Forward releasable for added safety
- Compatible with all Tesla T1 bindings

Weight: 1.5 oz/ea (42g) - 3.0 oz/pr (84g)

Black

Rider: Nick Russell
Photo: Colin Wiseman

Verts

When skinning just isn't an option, post-holing shouldn't be either. Our collaboration with Verts offers you a split friendly climbing alternative - the first ever splitboard specific snowshoe.

- Slide your Spark binding directly onto the adapter, no need for a separate snowshoe binding
- Designed specifically for ascending steep slopes
- Compact 18.75" x 8.5" (48cm x 22cm) footprint
- Toe forward design for fatigue-free front pointing
- High performance non-stick, super tough nylon

Weight: 1.21 lb/ea (548g) - 2.41 lb/pr (1095g)

BD Touring Straps

The 25 inch (63.5cm) Black Diamond Touring Strap slots through your highbacks to wrap around your boot for additional edging power while touring. Multifunctional as an all-around backcountry tool. Packaged as a set of two.

Weight: 1.3 oz/ea (39g) - 2.6 oz/pr (78g)

Green

Rider: Robin Van Gyn
Photo: Colin Wiseman

Baseplate Padding

Reduce foot fatigue on long tours and increase insulation on arctic days with our Baseplate Padding Kit. This is an easy retrofit to make your Spark bindings feel a bit more cozy. Baseplate Padding kits also include a pad for the snap ramp.

Weights:

1.20 oz/pr (34g) - Cutout 3
2.05 oz/pr (58g) - Solid 3

Black

Version	Models	Binding Size
Cutout Size 1	Arc ST	XS

Solid Size 2	Surge ST	S
Solid Size 3	Surge ST	M, L

Pillow Line Straps

We offer Pillow Line strap sets à la carte so everyone can enjoy the weight savings, performance, and durability in this molded one-piece waterproof construction. Ankle straps come in Arc ST & Surge ST models. Toe straps come in just one model. All straps come complete with buckles, plastics, and necessary hardware.

Black

Pillow Line Complete Ankle Weight:
Arc ST: 8.40 oz/pr (242g) - M
Surge ST: 8.80 oz/pr (252g) - M

Pillow Line Complete Toe Weight:
4.40 oz/pr (126g) - M

Patented

Asym Rip 'N' Flip Highbacks

Patented

Our Asym Rip 'N' Flip Highbacks are durable, ergonomic, and feature our famous split-specific forward lean adjuster that toggles easily between tour and ride mode. They are available à la carte in both the moderate flex Arc ST and the stiffer Surge ST models. The highbacks are backwards compatible with all our T1, Tesla, and pin-mount bindings.

Weight:
Arc ST: 3.35oz/ea (95g) - 6.70 oz/pr (190g) **Black**
Surge ST: 3.49oz/ea (99g) - 6.98 oz/pr (198g) **Black**

Pow Surfer Heel Loops

For all you split powder surfers out there! Pow surfer heel loops lower the highback and ankle strap to the lowest possible position, making it easier to store your bindings on or in your backpack while split pow surfing. You can use your bindings just for split mode or if your board also has pucks, you'll have plenty of control for descents when the snow isn't quite at surf quality.

Pow surfer heel loops come in XS/S and M/L to cover all sizes of Spark R&D T1 bindings.

ST Whammy Bars

We overmold a sleeve of plastic on both sides of the bar, right where the wire contacts the baseplate. This reduces friction allowing for super smooth movement into and out of high, low, and stowed positions.

Note: the ST Whammy Bar is not backward compatible with the Arc, Surge or other previous models due to a geometry change in both the baseplate and wire.

Our original Whammy Bars are also available.

Weight: 0.67 oz/ea (19g) - 1.34 oz/pr (38g)

ST 2nd Board Kit

Set up another splitboard to be tour-ready. Comes with screws, heel rests, and ST Touring Brackets. Pair this up with some Spark Pucks and your 2nd board is ready to go. Compatible with all Tesla T1 bindings.

Weight: 5.64 oz/pr (160g)

● **Black**

Splitboarders: Billy Madej & Ettore Personnettaz
Photo: Pierre Lucianaz

ST Bracket Kit

We overmold our custom plastic blend over and through the bracket holes in the aluminum base, for super smooth touring and maximum durability.

Compatible with all Tesla T1 bindings.

Weight: 3.28 oz/pr (93g)

● **Black**

Backcountry Kit

Everything you need to keep a pow day from being cut short. Includes spare plastics, screws, and buckles.

PRO Backcountry Kit

A Backcountry Kit specifically for splitboarders using our Pro Series bindings. Includes the same spare parts as standard BC Kit but with Pebax® plastics and pro series aluminum hardware.

Spark Tool

Your best friend in the backcountry, this tool has everything you need to adjust your splitboard and binding setup and includes a board scraper.

Hardware Kit

A minimal kit with all the basic hardware: screws, washers, t-nuts, and good Karma.

PRO Hardware Kit

A top-of-the-line hardware kit for our Pro binding users.

Dealer Spare Parts Kit

All you need to service your entire Spark R&D fleet and your customers' spare parts requests.
